Dear Hiring Manager,

I am writing to apply for the position of Software Engineer/DevOps Engineer. With a strong academic foundation in Computer Engineering and a keen interest in software development, I am excited about the opportunity to contribute to your team.

As a 3rd Year Undergraduate at the University of Ruhuna, I have been actively involved in various projects and coursework that have equipped me with a solid understanding of programming languages and development tools. I am proficient in Java, JavaScript, React.js, ReactNative, MySQL, MongoDB, Spring Boot, and have experience with Docker for containerization, Jenkins for continuous integration, and Git for version control.

In addition to my academic coursework, I am currently engaged in a project focused on implementing CI/CD pipelines to automate software delivery processes. This hands-on experience has deepened my understanding of DevOps principles and best practices, and I am eager to apply this knowledge in a professional setting.

While I may not have professional experience, I bring a fresh perspective, enthusiasm, and a strong willingness to learn. I am eager to apply my theoretical knowledge to practical scenarios and further develop my skills under your mentorship.

My academic projects have provided me with hands-on experience in web and mobile development, database management, and application development. I am particularly proud of a recent project where I developed a dynamic web application using React.js and Spring Boot, which enhanced my problem-solving abilities and collaborative skills.

I am highly motivated, detail-oriented, and possess excellent communication skills. I thrive in fast-paced environments and am adaptable to changing priorities. I am confident that my passion for technology and my dedication to continuous learning make me a suitable candidate for this position.

Thank you for considering my application. I have attached my resume for your review and would welcome the opportunity to discuss how my skills and experiences align with the requirements of the role. I can be reached via email at [sivasothytharsi@gmail.com](mailto:sivasothytharsi@gmail.com) or by phone at 0775191462. I look forward to the possibility of contributing to your team and eagerly await your response.

Sincerely,  
Sivasothy Tharsi
